

# PRODUCT OVERVIEW

BELMONDO®-RUBBER FLOORING

# We develop, test and optimize for the wellness of your horses.

Wellness for your horse is not only our slogan, it's the focus of our work. Wellness involves much more than just comfort and wellbeing. It is about environmental protection, sustainability, the avoidance of pollutants (PAHs) as well as economic efficiency in the stables.

## Rubber is what makes us special.

### 1. Environmentally friendly

Special recycling process preserves valuable resources.

The rubber base material in the tyre contains a lot of valuable rubber, making it an ideal raw material for products in horse husbandry, where high resilience and a long service life are a prerequisite. In addition, resources are preserved: unlike with typical mats made of new rubber, with BELMONDO® mats no rainforest has to make way for further rubber plantations.

Food-grade vegetable oils as plasticizers.

The term "plasticizer" has negative connotations because inferior mineral oils usually contain unnecessarily high amounts of PAHs that are harmful to the environment and health. Safety for the environment and health is important to us: instead of traditional plasticizers, we use only vegetable oils – naturally from European cultivation.

### 2. Economical

Less bedding and less work: an investment in rubber flooring quickly pays for itself.

Our rubber mats provide the necessary softness and heat insulation, the bedding only has to bind any liquid that is produced. This system with a soft rubber mat and reduced amount of bedding saves a lot of work when mucking out. Also positive: less dust and less manure result in a healthier stable environment!

### 3. Comfortable

BELMONDO® rubber flooring creates more safety and comfort for your horse throughout the stable.

Our rubber mats have been specially developed for horses and are therefore perfectly adapted to the specific areas of application.

This means for you:

- more horse comfort and less effort in the loosebox
- more comfort and less noise in the stable walkway
- more safety for key areas (such as washdowns and service area)
- robust, durable and easy-care flooring for daily use
- quick and easy installation thanks to the puzzle principle

### 4. Excellent

In addition to constant monitoring in our in-house laboratory, we also have our products tested externally for independent confirmation.

*Our products have passed the PAH test of the DLG with flying colours.*

*Important product properties such as slip resistance or acid resistance are externally certified by the DLG.*

*Many of our products have been licensed by the specialist department for animal-friendly husbandry and animal protection.*

*We are certified according to the globally valid quality and energy standards ISO 9001 and ISO 50001.*

BELMONDO® puzzle on 4 sides

loosebox and bedded area

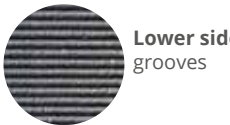

BELMONDO®  
Basic

**Basic loosebox  
comfort**

**Surface:**  
horseshoe  
profile
